## <JUNIOR FULLSTACK DEVELOPER>

### STATEMENT

Junior FullStack Developer, father and skater. After years in engineering and marketing, I decided to venture into an old passion, programming! Following six months immersed in this new world, doing some tricks in lines of code, flips and slides with the languages and frameworks, I'm prepared to overcome obstacles and face any challenges that you may present me. Besides this adventurous side, I also bring responsibility, resilience, and dedication acquired from fatherhood to the table.

### EDUCATION

#### JUNIOR FULLSTACK SOFTWARE DEVELOPER 2020
